
ViseeO | Solve Your Mercedes Bluetooth Problem

Mercedes Benz* Bluetooth Phone Cradle Car Kit

The ViseeO Mercedes* Bluetooth phone cradle in car hands free solution for mobile phones allows you to easily connect Bluetooth to Mercedes cars. It is the ultimate Mercedes* car kit solution.

There are 2 Viseeo Mercedes Bluetooth phone cradles available.

Click here to get the right one for your car.

Feature List

- Works with Bluetooth mobile phones

If you have Bluetooth, you can probably use a ViseeO. It works with every phone ever tested, including iPhone, iPhone 3G, iPhone 3GS, BlackBerry and Android phones.

The Mercedes Bluetooth SAP UHI adapter (the SLR styled one) works with very few phones, on restricted networks (it doesn't work at all with Three's 3G network *).

ViseeO pretty much works with any phone and any network.

- Emulates a real phone, so integrates perfectly, and all normal functions work perfectly **

- Works with integrated controls on steering wheel
- Uses existing integrated microphone
- Mutes audio on your sound system to make and answer calls
- Synchronises contacts with the Comand System (with most phones)
- Microphone fine-tuning for crystal clear sound without echoes

** Please note: SMS messages don't transfer to the car screen

- No Installation required!

• Install it yourself! No wires, tools or trim removal. It's the same size and shape as a mobile phone, so you just clip it in. (watch the install video here)

• Easy, starts instantly, and requires no expertise at all.

- Use multiple phones

- Link up to 3 devices. ViseeO will automatically connect with any of them
- Separate phone books for each device, maintaining privacy
- Move it from car to car, as it just plugs in without installation
- Connects automatically on start up. No more waiting to synchronise phone books before dialing. ViseeO will continue synchronising contacts in the background.
- Perfect if you have multiple drivers or multiple phones

- Maintains call logs

The Mercedes SAP 2.0 profile system keeps call lists in the car. If you miss a call in the car, it will not appear as a missed call on your phone when you leave the car. With Viseeo, calls missed in the car will still be available on the

phone, and vice versa.

- It maintains your privacy

The official Mercedes SAP solution takes total control of your phone, so if you want to talk privately, you can't transfer sound to your mobile and come off the speakerphone. With ViseeO, you can. You can even dial numbers directly from your mobile. Of course, this is when you are not the driver. Using your phone whilst driving is dangerous, and illegal in many countries.

- It's cheaper!

The ViseeO Mercedes Bluetooth adapter even costs less than the Official Mercedes Bluetooth phone cradle.

*The older Mercedes HFP solution will work with Three's 3G network
